Customer Problem Statement

Field	Description
I am (customer)	a daily commuter / traveller in a city who needs to reach a destination quickly and safely
Trying to	book a reliable cab within minutes without haggling over price or waiting on the roadside
But	existing options are slow to book, show unclear fares, and offer no live tracking or trip history
Because	there is no single app that combines instant nearby-cab discovery, transparent pricing, live tracking and saved payments
Which makes me feel	anxious and rushed, especially for time-critical trips such as catching a flight or reaching work on time

Final Problem Statement: "Urban commuters need a fast and dependable way to book a cab with transparent pricing and live tracking, because current alternatives are slow, opaque on fare, and offer no real-time visibility, which leaves riders anxious during time-sensitive trips."

IDEATION PHASE

DEFINE PROBLEM STATEMENT

People need a fast, reliable, safe and transparent way to book cabs, track rides in real-time and make secure payments.

KEY PROBLEMS IDENTIFIED

Difficulty in finding nearby available cabs

Long waiting time during peak hours

Unclear fare estimation and transparency

No real-time tracking of cab/driver

Limited and insecure payment options

IMPACT

User Inconvenience

Wastage of Time

Inefficient Operations

Safety Concerns

Low Customer Satisfaction

NEED FOR A SOLUTION

A modern, user-friendly, reliable and scalable cab booking system to connect passengers with nearby drivers seamlessly.

PROPOSED SOLUTION – UCAB

UCAB – MERN STACK CAB BOOKING SYSTEM

Easy & Quick Cab Booking

Real-time Driver Tracking

Fare Estimation Before Booking

Secure Online Payments

Booking History & Invoices

BENEFITS

Convenience for Users

Saves Time & Effort

Safe & Reliable

Improved Operational Efficiency

High Customer Satisfaction
